gPort

The gPort universal serial adapter is the perfect companion for your new blue G3 computer. Designed from the ground up with the G3 in mind it supports every serial device that works on your older Macs With the new G3s Apple has made a bold move to faster and more universal i/o interfaces. The gPort provides a great transition for people with existing serial equipment.

The gPort works perfectly and seamlessly. It works with all Apple and third party printers that are currently compatible with other Macs as well as Midi and any other Mac compatible serial device. It even allows file sharing over localtalk networks. The gPort connects to the modem slot of the G3 motherboard therby providing "board level" compatibility to existing serial software and hardware. Installation takes less than a minute.

The gPort is not only useful and universal, it is remarkably inexpensive. At a suggested retail price of $59. The gPort is indeed the ultimate G3 compatibility device.

gPort Device Compatibility

• Network printers such as LaserWriters using Localtalk
• Stylewriters including 1200, 1500, 2200, 2400, and 2500
